

# + INSPIRE Fellows Program

## Knee Instructional Course

15-17 November 2024

### Course Description

INSPIRE Fellows Program, a premier educational experience designed specifically for young orthopedic surgeons undergoing sports medicine fellowships. Over the course of three days, participants will engage in an enriching curriculum that combines theoretical knowledge with practical skills. Through a case-based approach, fellows will delve into complex scenarios that reflect real-world challenges, gaining insights from experienced professionals. The program will also include hands-on cadaver sessions, allowing participants to refine their surgical techniques and familiarize themselves with the latest advancements in sports medicine

### Learning Objectives

By attending this course participants will:

- Learn the current trends, technologies & anatomic-based repair & reconstruction techniques in treating knee injuries in Sports Medicine
- Discover key tips & tricks from expert faculty in knee repair & management through live cadaveric demonstration
- Explore the challenges and considerations when working with athletes with Knee Sports Medicine injuries
- Appreciate the latest scientific data that supports the different techniques in the field of knee injuries using Smith+Nephew technology

### Participant Profile

The INSPIRE Fellows Program is tailored for orthopedic surgeons who are currently engaged in or have recently completed their sports medicine fellowships. Ideal participants are those who are eager to enhance their practical skills and theoretical knowledge in advanced sports medicine, particularly in the context of knee injuries.
