

+ Clearly focused on what matters

Simplify your workflow with an
integrated fluid management system

Smith+Nephew

DOUBLEFLO[◇]
Inflow/Outflow Pump

Distributed by **Smith+Nephew**

Simple, effective, connected

The DOUBLEFLO^o Inflow/Outflow Pump is designed to be highly responsive in diverse clinical situations, enabling the device to respond to the surgeon's needs.^{1,2} Developed with **simplicity**, **effectiveness** and **connectivity** in mind, surgeons and staff are able to better focus on the procedure at hand.

+ Simple

The DOUBLEFLO Pump is easier to set-up than the competition with 56% fewer errors and 34% less time compared to FMS VUE^o and 36% fewer errors and 43% less time compared to DualWave.^{*3} This can help busy surgeons and staff focus on their patient, not the equipment.

Tube sets are designed to be easy to set up

Intuitive user interface to simplify set up + operation, and minimize adjustments and errors before and during the procedure

+ Effective

The DOUBLEFLO Pump is 17% faster than the competition** in response to a sudden decrease in joint volume, and 38% faster in response to a sudden increase in joint volume.***¹ The Pump is designed to provide consistent debris removal for clear visualization as well as an efficient flow to conserve saline and minimize set-up complications.

Offered with:

Remote Control to change settings conveniently during the procedure

Day tube set is designed to minimize waste*

*By extending saline use and tubing beyond a single procedure

LINK to connect to the INTELLIO^o Connected Tower

Does not require:

- Calibration step prior to use
- Fill chamber on inflow tubing
- Pinch points
- A cover

¹in a survey of 15 HCPs

²as compared to DualWave™ Arthroscopy Pump

³as demonstrated in benchtop testing

+ Connected

The DOUBLEFLO[®] Pump is designed to perform with the INTELLIO[®] Connected Tower, which provides a surgeon and staff the convenience of viewing critical settings via the onscreen display and one-touch set-up via the app.

Simple + centralized control

The LENS Connected Tower App is integral to achieving efficiency in operating your DOUBLEFLO Inflow/Outflow Pump by providing you with the ability to control fluid management settings wirelessly.

The DOUBLEFLO Inflow/Outflow Pump, part of the INTELLIO Connected Tower group of products, works seamlessly with LENS 4K Surgical Imaging, DYONICS Resection, and WEREWOLF COBLATION systems.
