## COMPLEX SHOULDER INSTRUCTIONAL COURSE

### Program Overview

This advanced shoulder instructional program is designed to be an interactive learning experience led by renowned sports medicine international surgeon faculty.

The delegates will discuss complex shoulder sports medicine cases with their peers and learn from experienced faculty members who will share their insights and expertise through lectures, live surgical demonstrations, and interactive discussions.

The course will also include hands-on workshops using cadaveric specimens, allowing participants to practice and refine their surgical skills.

## COMPLEX SHOULDER INSTRUCTIONAL COURSE

### Learning Objectives

By attending this course participants will:

Acquire knowledge and develop skillsets through hands-on cadaveric practice with advanced techniques and instrumentations for the management of various complex shoulder pathologies

Discover key tips & tricks from expert-level faculty in shoulder repair & management through live cadaveric demonstration with key focus on instability, glenoid bone loss, rotator cuff injuries and biceps tendinopathy

Appreciate the latest scientific data that supports the different techniques in the field of complex shoulder injuries management using Smith+Nephew latest solutions and technologies

### Participant Profile

- Orthopaedic surgeons in practice with a focus on sport medicine with a minimum of 8 years experience.
- Orthopaedic surgeons who have a desire to expand their surgical skills in minimally invasive shoulder repair.
- Proficiency in English for effective participation.
