Course Description

This Smith & Nephew Foot + Ankle Instructional course features scientific debates, workshops and open discussions, enabling delegates to extend their scope of practice in foot + ankle arthroscopy techniques. Focusing on Ankle/Hind foot arthroscopy and Instability/achilles tendon conditions, sessions will start with guided case discussions from the faculty around each topic followed by a lab session to cover the relevant surgical techniques. Anatomical workshops will ensure the delegates receive comprehensive tuition and practice the techniques required whilst using the relevant S+N products in a safe and controlled environment.

Learning objectives

- Explain different approaches to F+A instability and achilles tendon conditions
- Recognise complex F+A instability cases and understand ways to approach
- Observe, outline and practise current and emerging F+A surgical techniques

Participant profile

- Consultant orthopaedic surgeon who are undertaking more than 60 foot+ankle procedures a year for at least 5 years
- Surgeons with a high interest in advanced foot + ankle repair, wanting to learn techniques for managing instability conditions
- This course will be conducted in English, therefore a good command of the language is essential

ULTRABRACE® Kit

Day 1

11:30 Registration and
welcome lunch
17:30 Adjourn
19:30 Course dinner

Day 2

08:00 Meeting start
12:05 Lunch
14:45 Farewell and
departures
