Ask your pharmacist or doctor
about EXU-DRY Dressing

EXU-DRY[®] Dressings are a versatile range of highly absorbent wound dressings in a variety of shapes and sizes, including anatomical shapes, to meet a variety of patient needs¹⁻³

Features and benefits

Reduce frequency of change¹

The EXU-DRY Dressing range has been shown in a case series of 9 patients to reduce the frequency of changes to once a day*¹

May reduce pain¹

A case series of 9 patients showed that EXU-DRY may reduce pain experienced by the patient during dressing changes¹

Unique patented anti-shear layer⁴

EXU-DRY Dressing range has been designed with an anti-shear layer helping to minimise damage caused by friction and shear, helping to protect the wound⁴

Conformable^{4,5}

Conforms readily and comfortably to contours of the body^{1,5,6}

*Compared to traditional gauze/foam dressings.

Indications

Under the care of a healthcare professional, EXU-DRY Dressings are indicated as a primary dressing for exudate absorption and the management of superficial to full thickness wounds.

Typical wounds are:

- First and second degree burns
- Venous leg ulcers
- Grafts
- Bio-engineered skin substitutes
- Lymphoedema
- Skin sloughing disorders

EXU-DRY Dressings may be used as a secondary dressing and used in combination with other products (calcium alginates, gels, foams, etc.) that have been used to pack a wound.

The dressing may be used under compression if required, however dressings may require more frequent changes. For sheet dressings equipped with elastic straps, fix to a single bed mattress. A patient may then be placed onto the bed covered by the dressing.

EXU-DRY Speciality Absorptive Wound Dressings

S+N Code	Description	Carton
EXU-DRY Head		
5999FM1	Adult face dressing 23cm x 36cm	20
5999NKB6	Adult padded neck dressing with bib, 6-Ply 15cm x 63cm	10
EXU-DRY Arm/hand		
5999LPA	Arm/Hand dressing 69cm x 78cm	10
5999MPG	Medium padded hand dressing 31cm x 33cm	20
