

+ INSPIRE Advanced Knee Instructional Course

25-26 July 2025

Smith+Nephew

Academy

Education + Innovation + Excellence

Course Description

Challenge yourself and sharpen your skills in this immersive learning experience designed for sports medicine surgeons seeking to conquer the toughest knee problems.

You will be immersing yourself in an interactive environment debating controversial topics, dissecting challenging cases and witnessing masters of the craft showcase their techniques in real time.

Learning Objectives

By attending this course, delegates will be able to:

- Diagnose and develop treatment plans for complex knee injuries in athletes, including ligamentous instability, multi-ligament tears, meniscus injuries, and articular cartilage defects
- Perform advanced arthroscopic procedures for complex knee injuries, including ACL reconstruction, complex ligament considerations and patellar instability
- Apply evidence-based decision making in the management of complex knee injuries in athletes

Participant Profile

- Orthopedic surgeons or sports medicine physicians with a minimum of 8 years of experience performing knee surgeries.
- Surgeons who regularly encounter complex knee injuries in athletes, such as ligamentous instability, multi-ligament tears, meniscus injuries, and articular cartilage defects
- Individuals with a strong foundation in arthroscopic surgery
