Programme description

The INSPIRE Live Surgery Series is an interactive virtual education program for orthopedic surgeons, featuring live, step-by-step shoulder procedures with real-time Q&A and expert insights.

Learning objectives

1. Recall procedural indications and surgical objectives across a range of shoulder procedures, including instability, rotator cuff, and reconstructive techniques.
2. Distinguish key anatomical landmarks, step by step surgical workflows, and technical considerations across different shoulder procedures as observed during live surgical demonstrations.
3. Demonstrate understanding of intraoperative decision making, procedural specific technical challenges, and postoperative management principles to support safe surgical practice.
