

Simplified Management Reliable Tracking

Your all-in-one NPWT portal.

RENASYS[®] SMART PLUS

Simplified Management
and Reliable Tracking Portal

Managing traditional NPWT pumps can be **complex**

This complexity increases the burden on hospital budgets and already stretched clinical resources.

40% of users had no way to track pump utilisation.¹

Inaccurate tracking of traditional NPWT (tNPWT) pumps may lead to excess ordering and underutilised pumps.

Nearly 20% of users reported having lost tNPWT pumps in the previous year.¹

75% of clinicians agreed that a lack of visibility of the therapy provision may impact patient outcomes.²

More than 5 hours per week is spent managing tNPWT.²

An **easier** way to manage your tNPWT fleet

To meet the challenges of managing negative pressure wound therapy (NPWT) pumps, Smith+Nephew has developed an advanced fleet management system with the **RENASYS[®] SMART PLUS** portal.

Benefits of the **RENASYS SMART PLUS** Portal

Fleet management made easy

Web-based portal allows users to track and manage RENASYS pump availability and location.

Simple to use

Pump movements can be easily captured by the user. Instantly review current pump usage and availability via access to reports and dashboards.

Optimise NPWT usage

Provides insights on pump usage across departments within the hospital to optimise NPWT usage and improve fleet efficiencies.

Simplify billing

Improve administration and financial transparency of NPWT usage across multiple departments and hospitals.

Facilitates logistics

To maintain adequate supply of pumps, the portal ensures that pumps are replenished as needed or additional pumps are available to cover any increase in demand.

Designed for a **range** of users

Ideal for all hospital NPWT users

The **RENASYS SMART PLUS** portal provides users with a range of features to better manage their NPWT fleet.

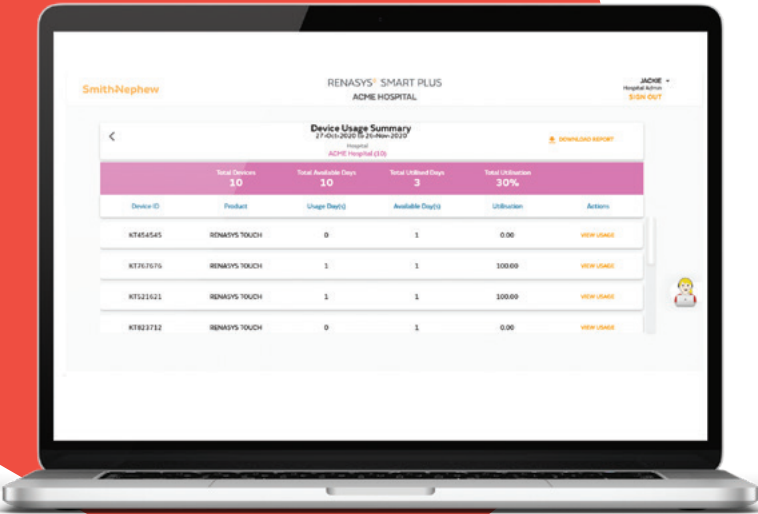

Ward staff

- Allows for simple activation, transfer and ceasing of pumps
- Provides visibility of available pumps
- Track and monitor pump location

Hospital administrators

- Track pump availability by location
- Monitor pump utilisation across the hospital
- Access usage reports and pump activity
