# Handheld Instruments

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Punches

Smith+Nephew offers a whole family of quality ACUFEX punches with a wide range of tip configurations that are designed to allow access to specific areas of the meniscus. Each punch is constructed with our exclusive pinless hinge design, one-piece outer shaft and hand-honed edge.

### Basket Punches – Narrowline

Small, aggressive tip design and narrow shaft provide excellent maneuverability and multiple plane-cutting capability in the posterior horn of the meniscus – even in the tightest joint.

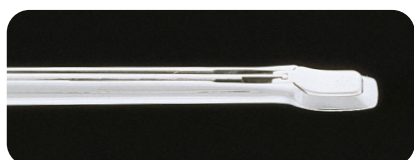

Product code		Description
<b>ACUFEX Pro Handle</b>	<b>ACUFEX Loop Handle</b>	
7207053	012052	Straight
7207052	012051*	Upbiter
7208679		45° Tip, Left
7208685		45° Tip, Right
7207552		Upswept, with larger finger and thumb loops

### Basket Punches – DUCKBILL Family

All-purpose low-profile punches with large square bite. Wave-tooth design allows for the maximum amount of tissue to be resected in tight knees.

Product code		Description
7207057	012013	Straight
7207058	012014*	Upbiter

### Basket Punches – DUCKLING Family

Combines wide bite of the DUCKBILL family style punch with the thinnest possible tip. This design provides optimum maneuverability under the condyle and allows good posterior advancement.

Product code		Description
7207049	012044*	Straight
7207050	012046	Curved Left
7207051	012047	Curved Right
7207000	012045	Upbiter
7207672	012048	Upswept

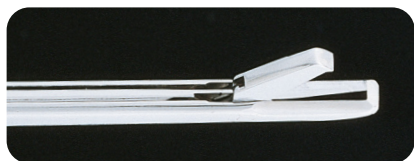

### Oval Punches

This family of punches offers the best of both worlds – the lowest profile and the largest bite, facilitating end-on and lateral cutting. It's the most versatile ACUFEX instrument available. Curved saw design enables smooth contouring of the meniscus.

Product code		Description
7207083	7207200	Upbiter
7207181	7207201*	Straight
	7207294	Curved Left
	7207295	Curved Right
	7207296	Upswept

\*Item shown

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Punches

### Basket Punches – Blunt Nose

Blunt nose and small size enable this instrument to get into the posterior horn for flush trimming of the meniscus.

Product code	Description
ACUFEX Pro Handle    ACUFEX Loop Handle	
012035*	1.0 mm, Straight

### Meniscal OVERBITER Punch

Specifically designed to resect the superior leaflet of the medial meniscus during an arthroscopic partial meniscectomy. Elevated lower tip is defined to prevent meniscus from resting against the tibia, enabling a clean bite. Blunt nose allows instrument to lie squarely against the posterior horn area, allowing flush trimming.

Product code	Description
7209878*	Overbiter

### Posterior Punches

Gradually tapered shaft, low-profile tip and short jaw permit the tip to open wide for cutting in tight posterior compartments.

Product code	Description
7207662                      012201*	Upbiter

### Basket Punches – STINGRAY<sup>®</sup> Family

Backbiting capability offers direct access to the anterior horn of the meniscus.

Product code	Description
7207055                      012059	Left
7207054                      012058*	Right

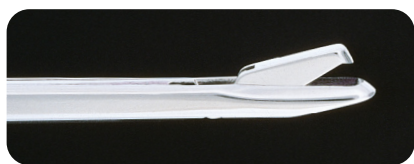

### Basket Punches – Meniscal Elevator

The extended lip of the lower jaw assists in placing the lower jaw underneath less mobile menisci.

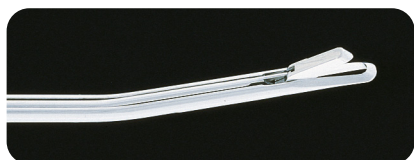

Product code	Description
012060*	1.3 mm, Straight

\*Item shown

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Punches

1.0 mm Scoop Family

1.3 mm Scoop Family

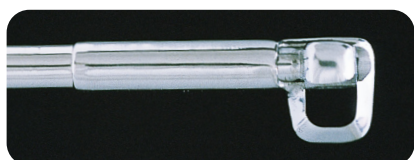

1.5 mm Scoop Family

### Basket Punches – Scoop

The most traditional style of instrument, a classical punch shape with the parrot-beak upper jaw to aid in the capture of tissue. Variety of shaft configurations allow maneuverability in difficult-to-access areas of the meniscus. Long jaw and wide design produce a wider, deeper cut than that of the 1.3 mm punch. The 2.7 mm scoop tip and hook are designed to direct and hold tissue for aggressive trimming in the midsection-to-posterior meniscus. And the 3.4 mm scoop provides a large bite for trimming in the middle meniscus; the workhorse punch of the scoop line.

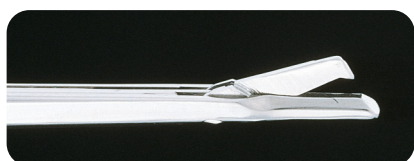

Product code		Description
<b>ACUFEX Pro Handle</b>	<b>ACUFEX Loop Handle</b>	
Right	012031*	1.3 mm, Upswept
	012033	1.3 mm, Downbiter
	012032	1.5 mm, Upswept
	012011	2.7 mm
	012012	3.4 mm

### Basket Punches – 90° Rotary

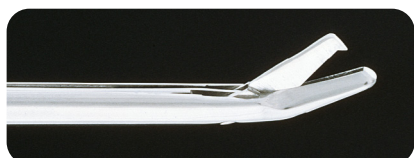

Offers the most effective angle for trimming the difficult-to-access anterior meniscus. Unique tip design allows for successive bites, making this instrument ideal for balancing the meniscal rim.

Product code		Description
<b>ACUFEX Loop Handle</b>	<b>ACUFEX Cigar Handle</b>	
010912	010906	2.2 mm, Left
010913*	010907	2.2 mm, Right
	010900	3.4 mm, Left
	010901	3.4 mm, Right

### Scissor Punches

Small bite size allows for increased visibility. The upcurved tip permits convenient shear cutting in the posterior aspect of the knee.

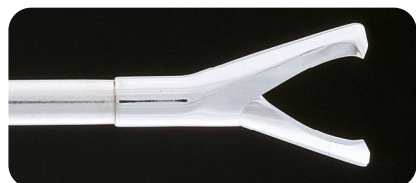

Product code		Description
7207047	012036*	Straight
7207048	012037	Upbiter

\*Item shown

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Scissors and Suction Punches

Smith+Nephew ACUFEX scissors are constructed without pins for maximum strength, dependability, durability and safety. A wide range of tips and angles enable the surgeon to effectively dissect any part of the meniscus from virtually any direction.

### Rotary Scissors

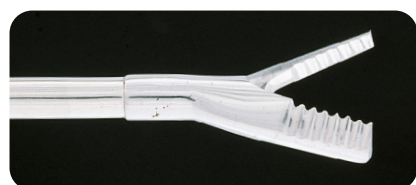

20° Hooked, Left and Right – Angle follows the natural contour of the meniscus. Small hook teeth enable the surgeon to probe before determining the final cut.

Product code		Description
<b>ACUFEX Loop Handle</b>	<b>ACUFEX Cigar Handle</b>	
010814*	010800	20° Hooked, Left
010815	010801	220° Hooked, Right

60° Hooked, Left and Right – Ideal for manipulation of tears in all aspects of the meniscus, because of its unique sideways cutting action and ability to fit into tight areas.

Product code		Description
010812*	010802	60° Hooked, Left
010813	010803	60° Hooked, Right

20° Short Serrated, Left and Right – This is the overall workhorse of the scissor line when successive cuts are needed because the short tip allows more accessibility in the joint and affords more precision and control.

Product code		Description
010816*		20° Short, Serrated, Left
010817		20° Short, Serrated, Right
	010806	20° Serrated, Left
	010807	20° Serrated, Right

### DYOVAC Suction Punches

Offers the dual convenience of resecting tissue while simultaneously evacuating through a suction channel in the instrument.

Product code	Description
3499*	2.5 mm, Straight
2685	5.2 mm, Straight
2707*	3.4 mm, Straight
3196*	4.5 mm, 90° Left
3197	4.5 mm, 90° Right

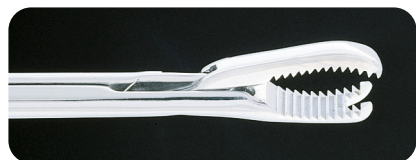

Tip of Suction Punch

\*Item shown

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Graspers

A broad selection of procedurally specific tip configurations provides maximum grasping capability and allows easy access to all areas of the meniscus from a variety of approaches. Graspers with the ACUFEX Grasper Handle feature an “infinite position” sliding-lock mechanism that is designed to hold tissue firmly without tearing or slipping, even in the tightest of areas. Locking mechanism is not available on ACUFEX Pro Graspers.

### Graspers – Loose-body Forceps

Unique serrated tooth design results in unsurpassed grasping strength for loose-body removal or large meniscal fragments.

Product code		Description
ACUFEX Pro Handle	ACUFEX Loop Handle	
7207061*	011022	PITBULL <sup>®</sup>

### Graspers – Cupped

Wave design allows for expansion of meniscus into the grasper cups to ensure a firm, non-sliding grip.

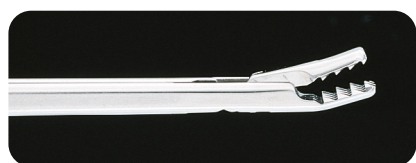

Product code		Description
	011012	2.7 mm
7207059*	011014	3.4 mm
	7207700	3.4 mm, length extended by 2.25"

### Rongeur

Enables cutting and removal of tissue. Particularly useful in ACL surgery.

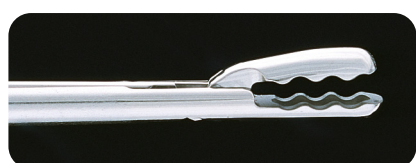

Product code	Description
014720	RAPTOR <sup>®</sup>
014843	RAPTOR Jr.

### Graspers – Alligator

Small size and shaft allow easy access to tight areas. Serrated tip prevents meniscus from sliding.

Product code	Description
011024	Alligator Max
7207699	Alligator Max, length extended by 2.25"

### Graspers – Atraumatic

Wave-tooth tip provides security for soft-tissue grasping under tension.

Product code	Description
011030*	Tissue Tensioner, Straight
014779	Cannulated Tissue Tensioner

\*Item shown

## Handheld Instruments: **ACUFEX<sup>®</sup> Handheld Instruments** Recommended Handheld Instrument Starter Kits

**SIMPLE SEVEN:** Looking for the most utility with the least amount of investment; we suggest this high performance seven-piece set.

Product code		Description
ACUFEX Pro Handle	ACUFEX Loop Handle	
7207057	012013	DUCKBILL Basket Punch, Straight
7207050	012046	DUCKLING Basket Punch, Curved Left
7207051	012047	DUCKLING Basket Punch, Curved Right
7207672	012048	DUCKLING Basket Punch, Upswept
7207058	012014	DUCKBILL Basket Punch, Upbiter
7207052	012051	Narrowline Basket Punch, Upbiter
	011024	2.7 mm Alligator Max Grasper

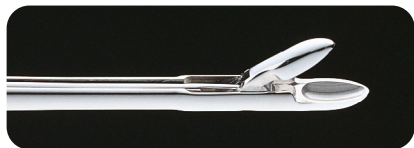

**FLEXIBLE FIFTEEN:** Need a more comprehensive instrument set for increased functionality; we suggest this fifteen-piece set.

Product code		Description
N/A	010912	90° Rotary Basket Punch, 2.2 mm Left
N/A	010913	90° Rotary Basket Punch, 2.2 mm Right
7207055	012059	STINGRAY <sup>®</sup> Basket Punch, Left
7207054	012058	STINGRAY Basket Punch, Right
7207057	012013	DUCKBILL Basket Punch, Straight
7207050	012046	DUCKLING Basket Punch, Curved Left
7207051	012047	DUCKLING Basket Punch, Curved Right
7207672	012048	DUCKLING Basket Punch, Upswept
	012012	Scoop Basket Punch, 3.4 mm, Straight
7207058	012014	DUCKBILL Basket Punch, Upbiter
7207047	012036	Scissors Punch, Straight
7207052	012051	Narrowline Basket Punch, Upbiter
7207662	012201	Posterior, Upbiter
	011024	2.7 mm Alligator Max Grasper
7207061	011022	PITBULL Loose-body Forceps

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Small Joint Instruments

This instrument set was specifically designed with the additional challenges of smaller joints in mind. The shorter shafts and lower profiles offer good access in the elbow and wrist and, in particular, are ideal for ankle arthroscopy.

### RAPTOR<sup>®</sup> Jr. Punch

Enables trimming and removal of articular cartilage. Useful biopsy tool.

Product code	Description
014843	RAPTOR Jr. Punch

### Blunt Nose Jr. Punch

Allows trimming of tissue, flush to other structures. Low-profile jaw offers maximum maneuverability.

Product code	Description
014844	Blunt Nose Jr. Punch

### PITBULL Jr. Grasper

Ideal for loose body removal, particularly in the ankle. Wide jaw opening is maximized, even in this smaller version.

Product code	Description
014845	PITBULL Jr. Grasper

### Small Joint Grasper

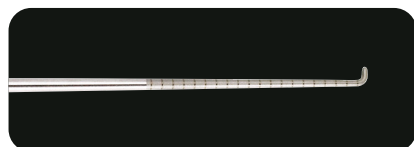

Alligator jaw ensures a firm grip on soft tissue

Product code	Description
013219	Small Joint Grasper

### Small Joint Instruments – DYOVA<sup>®</sup> Suction Punch

Product code	Description
3499	2.5 mm, Suction Punch

### Small Joint Probes

Product code	Description
3856	3 mm, Probe

3312	Hook Probe
------	------------

7209134	ELITE <sup>®</sup> Calibrated Probe
---------	-------------------------------------

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Small Joint Instruments

Micro instruments are designed to provide maximum grasping, resecting capability and excellent maneuverability for easy access to tight, small joints (wrist, elbow and ankle). All feature the pinless hinge for strength and reliability.

Product code	Description
7207868	Micro Instrument System

System includes: 7207598	MicroGraspers, Straight
-----------------------------	-------------------------

7207599	MicroGraspers, Up 10°
---------	-----------------------

7207600	MicroPunch, Straight
---------	----------------------

7207601	Teardrop Punch, Right
---------	-----------------------

7207602	Teardrop Punch, Left
---------	----------------------

3312	Probe
------	-------

3499	DYOVAC Straight Suction Punch, 2.5 mm
------	---------------------------------------

7207935	Sterilization Tray; holds up to eight Micro Instruments, plus probe
---------	---

Product code	Description
72201376	FERKEL 15° Open Curette, 4 mm

72201377	FERKEL 30° Open Curette, 2.5 mm
----------	---------------------------------

72201378	FERKEL 15° Open Curette, 2.5 mm
----------	---------------------------------

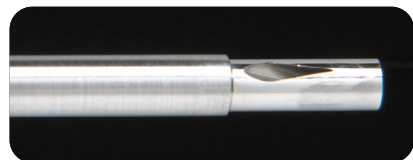

72201379	FERKEL 15° Anterior Lesion Curette, 2.5 mm
----------	--

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Shoulder Instruments

### ELITE<sup>®</sup> Premium Shoulder Instruments

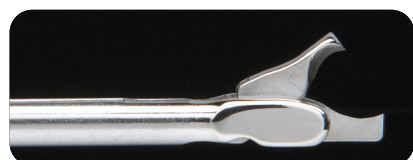

The ELITE Premium Shoulder Instruments offer comprehensive flexibility in arthroscopic and mini-open shoulder repairs, such as rotator cuff and Bankart repair.

Product code	Description
7209492	ELITE Sliding Suture Cutter

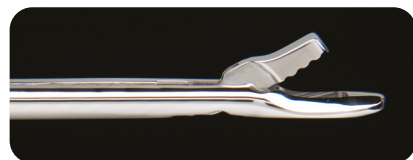

7209494	ELITE Suture Loop Grasper
---------	---------------------------

7209491	ELITE Double Hook Scissors
---------	----------------------------

### Capsular Release

The geometry of these instruments will assist in complete arthroscopic capsular release as a treatment for frozen shoulder. The extended nose allows blunt dissection between the capsule and surrounding musculature.

Product code	Description
7207539	Capsular Release Punch, Straight

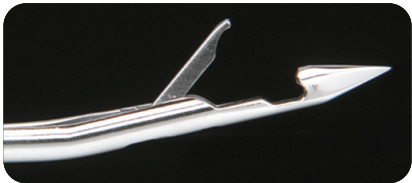

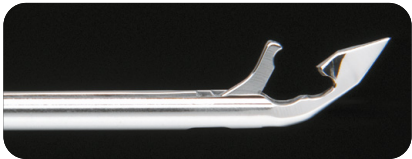

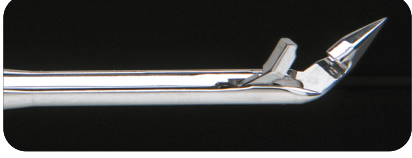

7207540	Capsular Release Punch, Upbiter
---------	---------------------------------

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Shoulder Instruments

### ARTHRO-PIERCE<sup>®</sup> Premium Instruments

Single-step suture passage is made simple with ARTHRO-PIERCE Premium Shoulder Instruments. The low-profile, highly sharpened tip is designed to allow easy passage through tissue in order to retrieve or apply suture.

Product code	Description
7209829	ARTHRO-PIERCE Premium Instrument System** System includes: 7209496, 7209497, 7209498, 7209499, 7209182.
 7209496**	ARTHRO-PIERCE Instrument, Straight
 7209499**	ARTHRO-PIERCE Instrument, 35° Up
 7210227	ARTHRO-PIERCE Instrument, 35° Up with 9° Upward Bend
 7209497**	ARTHRO-PIERCE Instrument, 45° Right
 7209498**	ARTHRO-PIERCE Instrument, 45° Left
 72201186	ARTHRO-PIERCE Instrument, Curved Left, Cigar Handle
 72201187	ARTHRO-PIERCE Instrument, Curved Right, Cigar Handle
7209182**	Sterilization Tray, 13" x 9" x 6"

\*\* Included in System

## Handheld Instruments: ACUFEX<sup>®</sup> Handheld Instruments - Hip Instruments

This instrument range was specifically designed with the additional challenges of hip arthroscopy in mind. Their extra length and low profile offer excellent access to the hip joint.

### Product code

7207545

### Description

Rotary 2.2 mm Left, Loop Handle

7207544

Rotary 2.2 mm Right, Loop Handle

7207735

Scoop 1.5 mm Upbiter

7207736

DUCKLING Upbiter

7207737

DUCKLING Upswept
