Wound Closure Strips

Helping you get **CLOSER TO ZERO[◇]**
human and economic consequence of wounds

smith-nephew.com

+ LEUKOSTRIP[◇] Wound Closure Strips are made of polyamide material coated with hypoallergenic adhesive, which helps minimise the incidence of skin reactions in patients.¹

LEUKOSTRIP Strips are available in two colours, white and beige (LEUKOSTRIP S).

Features and benefits

Minimised pain on removal

LEUKOSTRIP Strips help to minimise pain on removal.^{3,4}

Protects against tensile forces

LEUKOSTRIP Strips may aid wound closure by helping protect against tensile forces.¹

Reduction in scar appearance

LEUKOSTRIP Strips has been shown to help to reduce scar appearance when compared with standard of care, which may help to increase patient confidence.⁵

Up to 3 day wear time*

LEUKOSTRIP Strips adhere securely for up to 3 days*⁶ and 94.4% of health care professionals (HCPs) were satisfied with the dressing's adherence to the skin.¹⁴

Hypoallergenic

LEUKOSTRIP Strips are hypoallergenic, which helps minimise the incidence of skin reactions in patients.¹

Breathable

LEUKOSTRIP Strips are breathable and permeable to moisture vapour.²

Comfortable

LEUKOSTRIP Strips are comfortable for patients and maintains elasticity during wear time.^{3,4}

Indications

- For primary and secondary closure of skin wounds.

For detailed product information, including indications for use, contraindications, precautions and warnings, please consult the product's applicable Instructions for Use (IFU) prior to use.
