

We asked 150 clinicians how they're

# Shaping in pressure ulcer care

**what's possible**

1 in 10 adults are affected by hospital-acquired pressure injuries (HAPIs)<sup>1</sup>

## What will help reduce Pressure Ulcer incidence?

### Caregiver training

How can caregivers give better **patient-centred care**?

### Advances in dressing technology

What dressing **advancements** are most important?

### Hospital guidance and policies

Especially around **new platforms like Telemedicine...** how can it be used?

**2/5** say tailoring care plans based on **patient preference**

Communication and shared decision-making

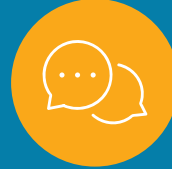

Integrating patient feedback

Automated pressure redistribution

**A third** say smart dressings with real-time wound monitoring, as well as...

Remote monitoring for early diagnosis

Easy interventions

Virtual wound assessments

Remote monitoring

“**How can we work together to shape what's possible in pressure ulcer care?**”

Co-development of innovative solutions

Increased data sharing for research & development

Strategic partnerships to drive awareness
